Project Proposal
THE HELP

41.Peter Joseph 42.Pranoy Paul 55.Siddarth M 57.Stamley Johnson

January 18, 2017

1 Introduction

The project aims at providing people the luxury to search and find the perfect domestic help in the country. It provides a platform that showcases an array of attributes, skills and authenticity of various profiles for candidates recruited for the domestic help. It is the perfect solution for the public's need for domestic help.

2 Proposed Project

2.1 Problem Statements

There exists no proper system which deals with the issue of finding the perfect domestic help that considers both the authenticity and the quality of the work done.

2.2 Problem Solution

A website or an application can be developed which can act in favour of both the public and the candidates. The general public is provided with the opportunity to search and choose their perfect domestic help by taking into consideration all their work requirements. The candidates get the chance to showcase their skill set to the public through a single portal and also maintains the authenticity of their profiles.

2.3 Hardware & Software Requirements

- Laptop
- Phone
- Django
- MySql
- Miktex
- CSS
- HTML
- JavaScript

We are in possession of the above mentioned requirements and they are all legally permitted to be used.

2.4 Work Schedule

Week	Work to be compiled
1	Requirement Specification
2	Basic Layout of Website
3	Database Design
4	Creating User Profiles
5	Login and Signup
6	Search Algorithm Implementation
7	Integration and Testing
8	Project Review
